(Animal / Veggie)

Chewable  
soft capsule

Hard capsule  
(Animal / Veggie)

Enteric capsule

## Powder

Powder

Granuled powder

Extruder

Probiotics Powder  
(EPP)

## Liquid

Liquid

Oil

## Jelly / Gummy

Jelly Stick/  
No water added Jelly Stick

Gelatin Gummy

Plant-based Gummy  
(Pectin)

# Packaging

Customized packaging design options using the latest packaging technology for all dosage forms.

## Solid

Various PTP

Multi pack (Tablet-Capsule)

Diverse pouches

Powder stick (1.5 ~ 47g)

Powder pouch (16 ~ 800g)

Bottle - Tablet / Capsule / Powder (60 ~ 1,000g)

## Liquid

Drops

Dropper

Spray

Liquid stick / pouch

Bottle (30 ~ 1,000ml)

# Innovative Manufacturing Technology

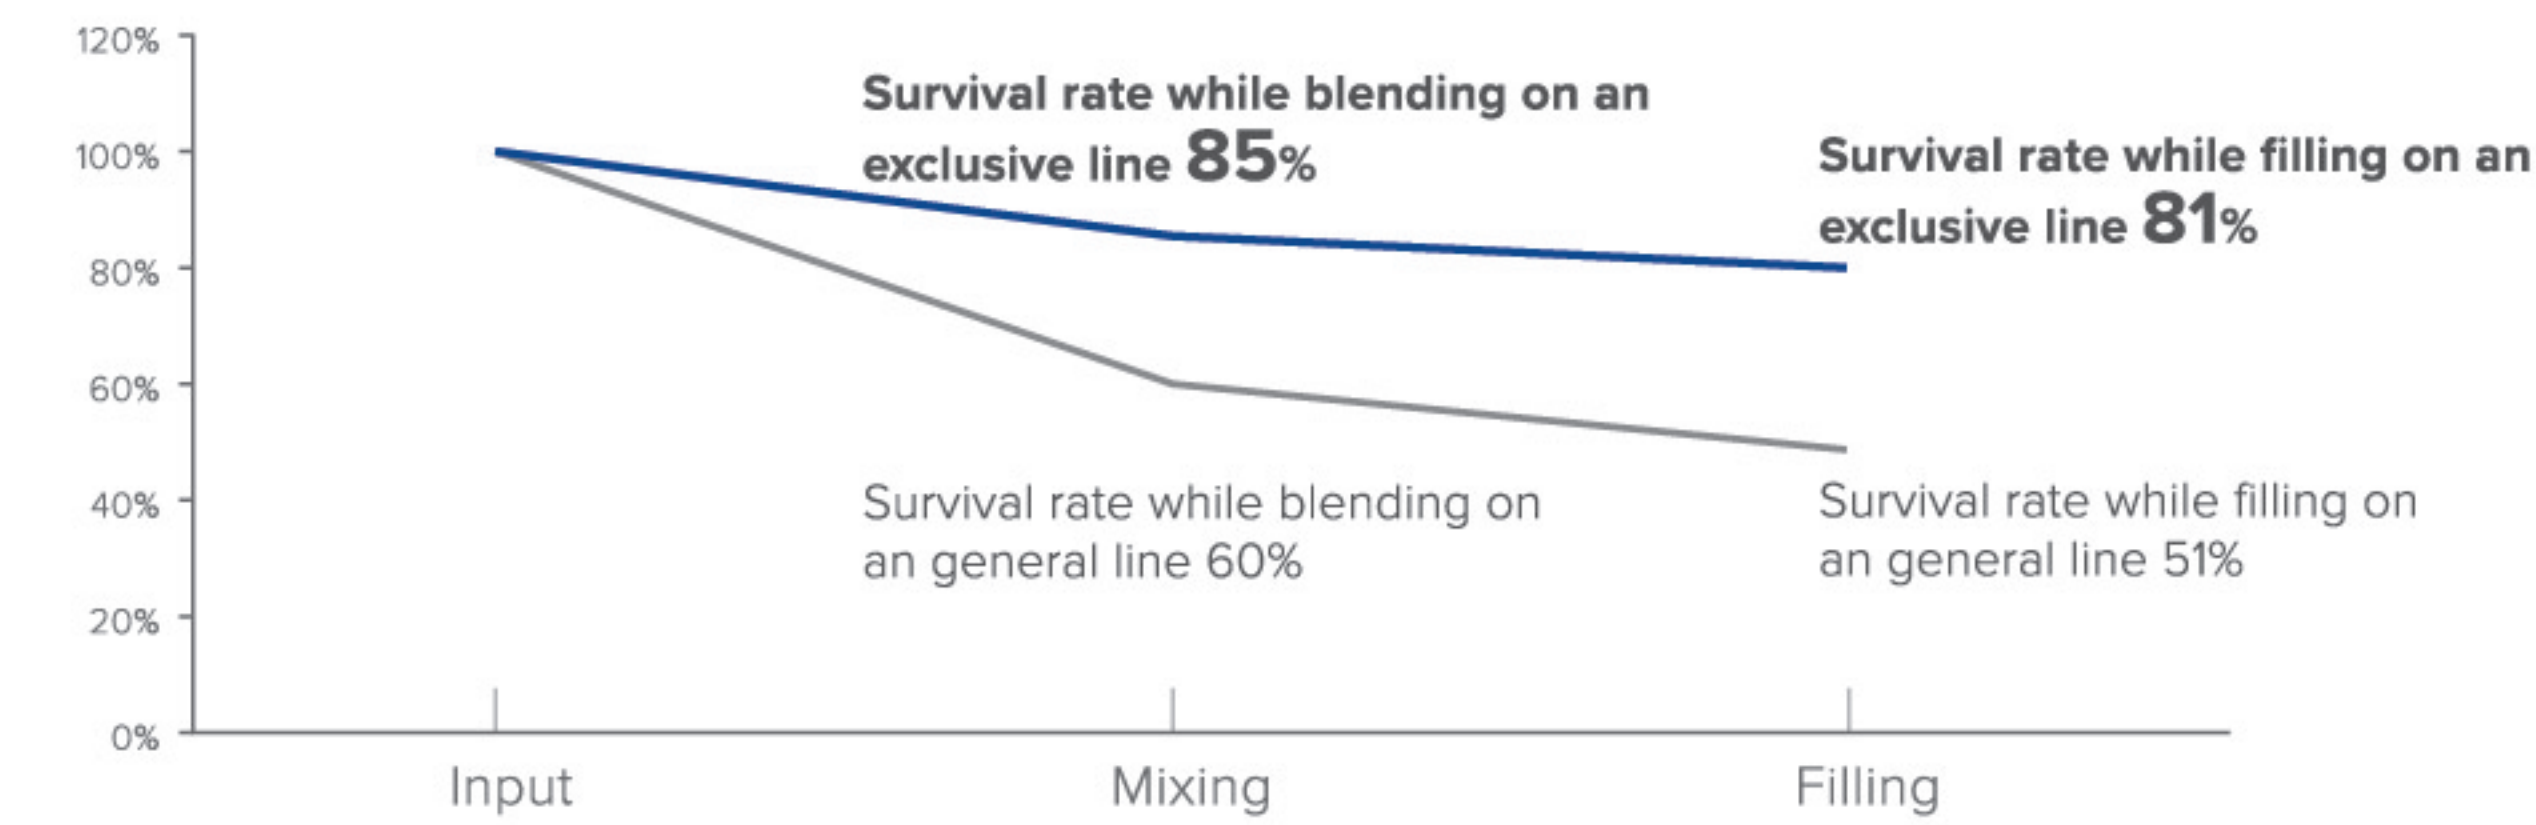

Exclusive Production Line for Probiotics

## EPP (Exclusive Production Line for Probiotics)

Probiotics require precise temperature and moisture.

EPP controls both conditions.

- The COSMAX NBT R&D team has over 17 years of experience specializing in probiotics. Probiotics (Lactobacillus, Bifido, etc) product testing is a very in depth testing procedure. Additionally, stability testing is conducted over 12 months. EPP (Exclusive Production Line for Probiotics) provides a constant temperature and humidity manufacturing process that guarantees an increased survival rate.
- Available dose form: powder sticks, hard capsule, chewable tablet.

# International Certification & Certified Quality Control system

International certifications to ensure product meets and exceeds standards in the market place.

## Micro - Emulsion Technology

- A highly pressurized fluid undergoes cavitation, turbulence, and shearing as it passes through the homogenizer valve. The process forces the fluid particles to atomize, emulsify, and disperse resulting in a smaller particle size distribution. Based on the emulsification process, the smaller particles and refined molecules can be expected to yield a higher bioavailability.
- Available dose forms: softgel, jelly stick, gummy, liquid

### At COSMAX NBT, we believe that having control over quality from start to finish is absolutely critical.

The products we manufacture, are ultimately going to be ingested by consumers. For this reason, thorough testing on all finished products is completed to ensure the highest quality products. This testing may include HPLC, IR, GC, ICP, and UV analysis. Our facilities can help secure kosher and vegetarian certifications. If requested, we can also offer third-party Non-GMO, gluten-free, and other allergen specific testing services.

### Our in-house regulatory department utilizes the latest equipment and testing methods available.

Our products will meet product specifications as requested. Our in house QA team makes sure all raw materials are tested upon receipt. The thorough testing continues throughout the manufacturing process. The QA team adheres to the strictest standards throughout the process.

### Certifications are an important gauge for your manufacturing vendor.

At COSMAX NBT, we have the highest level of certifications including the NSF, TGA, ISO22000, kGMP and soon USP verified certification. We have the ability to produce items that meet Informed-Choice, Informed-Sport, Kosher and Halal ratings. COSMAX NBT continues to be certified across all areas of certification.

# Specialized Ingredient Formulation (R&D)

COSMAX NS develops extracts with the active ingredients. The most innovative extraction technologies enable us to obtain unique, high value-added, functional ingredients. We are continually developing ingredients from nature in a range of categories – from skin, diet, joint, muscle health to hangover cures. We add value to our functional ingredients using the most innovative extraction technologies, strict quality control, and continuous research.

**COSMAX NBT and COSMAX NS, offer not only manufacturing services but also customizable ingredients for specialized products.**
